ENCORE Alert September 2023

ENCORE is an innovative project that brings together cutting-edge data-driven techniques, and a qualitative pedagogical approach to foster the use of OERs and existing taxonomy of skills- ESCO to produce resources for teachers

Dear colleague,

Welcome to our newsletter, directed to all colleagues interested in the ENCORE project. Our purpose is to let you know what has been happening in the different areas of work and to inform you on what project activities are coming up so that you can share them with colleagues and other interested contacts.

WHAT HAS BEEN HAPPENING IN THE PROJECT?

ENCORE: international conference coming soon

Last week the project partners from ENCORE gathered in Gothenburg, Sweden for a two-day partner meeting.

The Erasmus+ project **ENCORE** is working on something special to spice up your teaching experience! We're blending innovative, data-driven tools to elevate the way we design our teaching methods. ENCORE is crafting a unique tool aimed at assisting you in developing courses with meaningful learning outcomes, focusing on essential skills that students need in this digital, ever-changing, post-COVID world.

ENCORE is planning an **international conference** to give you a sneak peek into what we've been working on. Keep an eye out for more details via <https://project-encore.eu/>.

Initial development steps of the ENCORE plugin for Moodle LMS

The ENCORE Moodle plugin promises to enhance the e-learning experience by integrating ENCORE Enabler for Educators (E4E) results directly into the platform. Educators can now effortlessly upload a file encapsulating their E4E results. But that's not all! The plugin introduces a novel resource termed "ENCORE OER". This feature grants educators the autonomy to handpick an Open Educational Resource (OER) and seamlessly link it to their chosen Moodle course. Recognizing the dynamic needs of the teaching process, the plugin offers flexibility, allowing users to not only switch out the OER file but also modify the OER repository within the course itself.

Encore Enablers: Innovative Digital Tools for Supporting Educational Processes

We are pleased to introduce Encore Enablers, a suite of specialized digital tools crafted to optimize resource utilization within the ENCORE project. Developed by FBK, these tools cater to educators and learners.

The Enabler simplifies learning design by seamlessly interfacing with the ENCORE database, granting educators access to Open Educational Resources (OERs) aligned with Green, Digital, and Entrepreneurial (GDE) skills. Educators can assign resources and structure activities through a streamlined three-step process: discover, collect, and design. Encore Enablers promise to support educational processes for both educators and learners, offering enhanced resource management and customized learning journeys. These enablers have undergone validation with ENCORE partners.

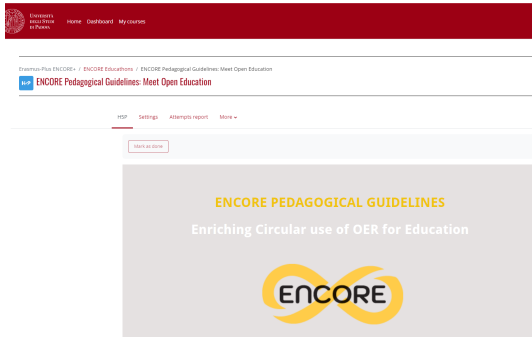

Stay tuned for updates on the educational impact of Encore Enablers and their forthcoming pilot programs in the months ahead.

ENCOREs pedagogical guidelines

The UNIPD team is progressing in creating pedagogical guidelines to maximize ENCORE's educational potential. They're finalizing a document addressing scholarly work on open education, OER quality, and engagement in the EU and globally. The focus is also on the importance of DGE skills in open resources. Post-Salamanca workshop, there's a noted abundance in materials for digital competences but a lack in green competence. After Gothenburg's meeting, emphasis was on quality design for learning in ENCORE.

More insights will be shared in upcoming guidelines.
Stay tuned!
